ABOUT ME

Technology has always interested me because of its ability to turn ideas into practical solutions. That curiosity led me to pursue Computer Science at Herald College Kathmandu, where I've developed a strong foundation in software development while discovering that I enjoy collaborating with people just as much as writing code. I approach challenges with curiosity and persistence, valuing clear communication and delivering reliable work.

EDUCATION

BSc (Hons) Computer Science

Full-time Undergraduate Program

Herald College Kathmandu

Kathmandu, Nepal

TECHNICAL SKILLS

Frontend & UI: React 19, TypeScript, TanStack Start, Vite, Tailwind CSS, Framer Motion, Lenis

Backend & Systems: Node.js, SQL, REST APIs, Git & GitHub Version Control

Workflow & Management: Agile Sprints, Trello Workflow Coordination, User Documentation

FEATURED PROJECTS & SOFTWARE

Expense Tracking App (Full Stack / SaaS)

2025

Project Manager & Developer — React 19, Tailwind CSS, SQL, Trello

- Broke down feature requirements into weekly sprints on Trello and led team check-ins to unblock hurdles.
- Built interactive budget calculation components and authored complete user guides.

Task & Sprint Coordination Workspace (Productivity Engine)

2025

Lead Engineer — TanStack Start, Vite, React 19, Framer Motion, Tailwind CSS

- Designed a modern web workspace featuring dynamic 4-column Kanban boards and sprint velocity trackers.
- Implemented one-click phase transitions and priority status card management.

AI Developer Workspace & Workflow Suite (Developer Tools)

2025

Creator — TypeScript, Node.js, AI Tooling, Vite, Tailwind CSS

- Created developer environment designed to assist code analysis and automate repetitive refactoring workflows.
- Integrated syntax-highlighted code output terminal with clipboard integration.
